FLUVANNA OPPOSES VALLEY LINK

WHAT EVERY FLUVANNA RESIDENT SHOULD KNOW

Valley Link is proposed, not approved. Your local knowledge still matters.

OUR MISSION

Fluvanna Opposes Valley Link is a nonpartisan, citizen-led effort dedicated to informing Fluvanna residents about the proposed Joshua Falls to Yeat 765-kV transmission project and helping our community participate effectively in the public review process.

175 FEET	200 FEET	~20 MILES
typical tower height	typical right-of-way	preliminary options in Fluvanna

HOW YOU CAN MAKE A DIFFERENCE

LEARN THE FACTS

The project and its route options remain preliminary. These points come from current Valley Link and County materials.

- **Scale and setting.** Valley Link describes a new 765-kV line of about 115 miles from Campbell County to Culpeper County, with roughly 20 miles in Fluvanna, and 150- to 175-foot-tall towers in a 200-foot-wide right-of-way. At this scale, the towers could be visible, and noise from the energized lines could be heard, far beyond the right-of-way.
- **Impact on Fluvanna.** The preliminary route options would create new transmission corridors rather than use existing transmission line easements. To obtain access to the corridors, construction may be required beyond the proposed right-of-way, including for tower sites and work staging areas.
- **This is not a done deal.** Routes are preliminary, not final. Route-specific access, construction and operational sites, and staging and restoration plans have not been presented. The State Corporation Commission will decide whether, and along what alignment, the project may be built after a public filing and review process.

If built at this scale, it would make a generational change to Fluvanna's rural landscape. This is the time to document the farms, homes, environments and history that may be impacted or destroyed by this project.

STAY INFORMED

Where are we now? No Valley Link application appears on the SCC docket, and no route has been approved. Routes remain preliminary and revised routes are expected before or with an SCC filing.

- **Start with current information.** Visit FluvannaOpposesValleyLink.org and follow us on Facebook for updates, source links, maps and events. Local news, advocacy groups and community organizations can also help you follow the process.
- **Follow the public record.** Watch the SCC docket, Fluvanna Board of Supervisors and Planning Commission meetings, agendas and materials, and Valley Link's public website.
- **Pass along reliable information.** Tell your friends, neighbors, family and other community members. Encourage them to stay informed and get involved too.

GET INVOLVED

Your local knowledge and community involvement matter.

- **Create your own record of what matters.** Official maps do not always show the full picture. Keep dated maps, notices, photographs taken from safe and lawful locations, and notes about resources that matter to you or your community. Keep sensitive locations private. Visit our website for self-guidance and public resources.
- **Volunteer to help.** Help with research, source checking, communications, mapping, outreach, photography, data entry, events and other practical tasks. Professional skills are welcome, but there is a role for anyone ready to help. Learn more on our website. It will take a community effort to keep Fluvanna informed and engaged.
- **Host a presentation.** Contact us to schedule a fact-based presentation for your organization or community group.
- **Be heard in the SCC record.** Submit comments or speak when the SCC's case-specific process provides an opportunity. Consider becoming a respondent if a proposed route directly impacts your land or livelihood. We can help explain that process. The SCC's case-specific order will determine whether a public hearing will be held and if so, where and when.

v.3 2026.11.01

FLUVANNA OPPOSES VALLEY LINK

PRELIMINARY VALLEY LINK ROUTE OPTIONS THROUGH FLUVANNA - JULY 2026

Map key: Gold, blue and magenta lines show preliminary Valley Link route options. Purple lines are existing transmission lines shown on Valley Link's source map.

WRITE OR CALL ELECTED OFFICIALS

Share how the proposed project may affect you, your community and the places you value. Details verified November 1, 2026.
